TABLE 1: This shows the official requirements on each side of the Atlantic.

FAA REQUIREMENTS

MEDICAL KIT:
Stethoscope (1)
Sphygmomanometer (1)
Airways (3 sizes)
Syringes
Needles
Protective latex gloves
Basic instructions for drug use

MEDICATION:
50% dextrose injection
Epinephrine
Diphenhydramine
Nitroglycerin tablets

FIRST AID KIT:
Adhesive 1in bandage compresses (16)
4in bandage compresses (8)
4in roller bandage
Triangular 40in bandage compresses (5)
Antiseptic swabs (20)
Arm splint (non-inflatable) (1)
Leg splint (non-inflatable) (1)
Ammonia inhalants (10)
1in adhesive tape, standard roll
Bandage scissors (1)

JAA REQUIREMENTS

FIRST AID KIT:
Bandages
Burns dressings
Wound dressing, large and small
Adhesive tape, safety pins and scissors
Small adhesive dressings
Antiseptic wound cleaner
Adhesive wound closures
Adhesive tape
Disposable resuscitation aid
Simple analgesic, eg, paracetemol
Antiemetic, eg, cinnarizine
Nasal decongestant
First aid handbook
Splints, suitable for upper and lower limbs
Gastrointestinal antacid
Anti-diarrhoeal medication, eg, Loperamide
Ground/air visual signal code for use by survivors
Disposable gloves
List of contents in at least 2 languages, including information on effects and side effects of drugs used.

EMERGENCY MEDICAL KIT:
Sphygmomanometer - non-mercury
Stethoscope
Syringes and needles
Oropharyngeal airways (2 sizes)
Tourniquet
Coronary vasodilator, eg, nitro-glycerine
Anti-spasmodic, eg, hyascene
Epinephrine 1:1000
Adrenocortical steroid, eg, hydrocortisone
Major analgesic, eg, nalbuphine
Diuretic, eg, fursemide
Antihistamine, eg, diphenhydramine hydrochloride
Sedative/anticonvulsant, eg, diazepam
Medication for hypoglycaemia, eg, hypertonic glucose
Antiemetic, eg, metoclopramide
Atropine
Digoxin
Uterine contractant, eg, Ergometrin/oxytocin
Disposable gloves
Bronchial dilator - including an injectable form
Needle disposal box
Anti-spasmodic drugs
Catheter
List of contents in at least 2 languages, including information on effects and side effects of drugs used.
